ITS HOW WE BUILD IT

BUILT TO LAST FOREVER

Between our Rotary Punches and Fiber Optic laser, these machines are programmed to cut metal with tolerances as tight as three-thousands of one inch. High-end press brakes then form the materials before being passed to a welding team with years of experience. Everything is then assembled by hand with detailed focus from our hard-working staff, with quality checkpoints between each stage to ensure only the highest quality standards that can hold up to our true Lifetime Warranty.

EMPLOYEE SATISFACTION

We even cover the components that we know fail over time, like gas shocks and weather stripping. We expect you to beat up our products and you can trust them to last. Other than finishes like paint and powder coat, and normal wear and tear like dings and dents, you can have the peace of mind in knowing you really have bought the last truck product you'll ever need to buy.
